Professional Summary

Data & AI Developer | Applied Machine Learning & Analytics

AI Technician with experience developing Data and Artificial Intelligence solutions applied to business problems.

Focused on RAG architectures, NLP systems, and data pipelines using Python and SQL, integrating backend and cloud services to support automation and data-driven decision-making.

EDUCATION

Universidad Nacional de Rosario (UNR) | Rosario, Argentina

Technical degree in Artificial Intelligence | In progress - Advanced

PROFESSIONAL EXPERIENCE

Software Engineer (Trainee) | Renaiss

Rosario, Argentina (Hybrid) | December 2025 – Present

- Collaborating in the development and maintaining of modern backend architectures, applying clean code principles and scalability best practices.
- Collaborating in the development of RESTful APIs using FastAPI integrated with cloud services, enabling efficient communication between backend components.
- Containerizing applications with Docker and Docker Compose, standardizing development environments to ensure consistency across the team.
- Contributed to application modernization initiatives within agile, collaborative teams.

Data Analyst – Automation & AI | Laboratorios Turner

Rosario, Argentina | July 2025 – January 2026

- Led the end-to-end development of a corporate generative AI chatbot, leveraging NLP and RAG architectures to automate responses to complex internal and customer queries.
- Designed and implemented automated ETL pipelines in Python for extracting, cleaning, and consolidating critical business data.
- Optimized SQL Server databases, building complex queries for stock and supplier analysis, improving accuracy and decision-making speed in purchasing processes.

Procurement Analyst | Laboratorios Turner

Rosario, Argentina | June 2024 – July 2025

- Analyzed cost structures and supplier performance using historical data to identify savings opportunities and improve purchasing decisions.
 - Managed end-to-end procurement workflows, ensuring availability of critical supplies while optimizing operational efficiency.
-

TECHNICAL SKILLS

- **Data & AI:** Pandas, NumPy, Scikit-learn, NLP, RAG, Data Warehousing
- **Programming:** Python (Advanced), SQL, R, Bash
- **Backend & Cloud:** REST APIs, Git, CI/CD, Docker, Cloud Services
- **Tools:** Power BI, SQL Server, MySQL, n8n (Automation), Streamlit
- **Languages:** Spanish (Native), English (Advanced – EF SET)
